The Honorable Leverett Saltonstall  
United States Senate  
Washington, D. C.

Dear Senator Saltonstall:

We understand that there is now before the Armed Services Committee a bill to authorize Government support of an Antarctic expedition. Such an expedition, whether carried out under the auspices proposed in S. 3381 or otherwise, appears to us to be in the national interest, inasmuch as there is a paucity of information on this area. While much of an expedition's findings will be of value to other departments of the Government, this Agency is concerned with any information bearing on the area and the activities of other nations in the area. Delay in the authorization of an expedition would certainly be detrimental to our overall intelligence respecting Antarctica.

I trust, therefore, that legislation to authorize and finance an Antarctic expedition may be considered during the present session of the Congress.

Sincerely,

SIGNED
